

## The Time Is Now for BOTOX® Start saving today.

BOTOX® can be an affordable way to manage your Overactive Bladder (OAB) symptoms. Most major insurance plans, including Medicare and Medicaid, cover the cost of BOTOX® treatment.\* Some patients with commercial insurance may have remaining out-of-pocket costs—especially early in the year, before reaching the maximum deductible of their insurance plans. The BOTOX® Savings Card is available to offset those costs.

### Savings Offer†

Greater savings are available at the beginning of the year, when medical expenses are typically highest

- Save up to **\$500** on treatments occurring between **January 2016 and June 2016**
- Save up to **\$300** on treatments occurring between **July 2016 and December 2016**

Visit [BOTOXSavingsCard.com](http://BOTOXSavingsCard.com) or call 1-800-44-BOTOX, Option 4, to learn more and enroll today!

### The BOTOX® Savings Card Can Help You Stay on Course With Your Treatment Plan

Commercial patients who are new to, or continuing their treatment with BOTOX®, are both invited to take advantage of this savings program.

Remember that a key part of managing your OAB symptoms with BOTOX® is staying up-to-date with the timing of your treatment plan. Continue to use the BOTOX® Savings Card toward your next BOTOX® treatment.

One BOTOX® treatment can last 4 to 6 months. You and your doctor will determine your individual treatment schedule based on the results of the first treatment cycle.

\*Based on data pulled from IMS/Pharmetrics claims database, treatment dates January 2013–December 2014 (1549 total claims).

†Maximum of \$800 in savings per patient per year. The amount you receive on the card will not be higher than your out-of-pocket costs for BOTOX® treatment.

Restrictions apply. Please see full Eligibility Rules for more details at [BOTOXSavingsCard.com](http://BOTOXSavingsCard.com).

[BOTOXSavingsCard.com](http://BOTOXSavingsCard.com) or call  
1-800-44-BOTOX, Option 4.

How it works: If you are eligible, you will receive a welcome kit filled with details about the program and instructions on how to receive your savings on a prepaid Visa debit card. Savings are received after treatment with submission of an approved explanation of benefits showing out-of-pocket costs remaining. After your information has been verified, your prepaid card will be sent to you.

### Do I Qualify for Savings?

To qualify, you must be:

- ✓ **18 years of age or older**
- ✓ **Commercially insured and not insured by Medicare, Medicaid, or another federal or state government health care program**
- ✓ **Either currently receiving or planning to receive BOTOX® treatment for OAB symptoms**

BOTOX® is a prescription medicine approved to treat overactive bladder symptoms such as a strong need to urinate with leakage or wetting accidents; urgency and frequency in adults when another type of medication (anticholinergic) does not work well enough or cannot be taken.

### IMPORTANT SAFETY INFORMATION

**BOTOX® may cause serious side effects that can be life threatening. Get medical help right away if you have any of these problems any time (hours to weeks) after injection of BOTOX®:**

- **Problems swallowing, speaking, or breathing**, due to weakening of associated muscles, can be severe and result in loss of life. You are at the highest risk if these problems are pre-existing before injection. Swallowing problems may last for several months.
- **Spread of toxin effects**. The effect of botulinum toxin may affect areas away from the injection site and cause serious symptoms including: loss of strength and all-over muscle weakness, double vision, blurred vision and drooping eyelids, hoarseness or change or loss of voice, trouble saying words clearly, loss of bladder control, trouble breathing, trouble swallowing.

Botox® may cause loss of strength or general muscle weakness, vision problems, or dizziness within hours to weeks of taking Botox®. **If this happens, do not drive a car, operate machinery, or do other dangerous activities.**

**Please see additional Important Safety Information on reverse side.**

**IMPORTANT SAFETY INFORMATION (continued)**

**Do not take BOTOX<sup>®</sup> if you:** are allergic to any of the ingredients in BOTOX<sup>®</sup> (see Medication Guide for ingredients); had an allergic reaction to any other botulinum toxin product such as *Myobloc*<sup>®</sup> (rimabotulinumtoxinB), *Dysport*<sup>®</sup> (abobotulinumtoxinA), or *Xeomin*<sup>®</sup> (incobotulinumtoxinA); have an infection at the planned injection site.

**Do not take BOTOX<sup>®</sup> for the treatment of urinary incontinence if you:** have a urinary tract infection (UTI) or cannot empty your bladder on your own (and are not routinely catheterizing). Due to the risk of urinary retention (difficulty fully emptying the bladder), only patients who are willing and able to initiate self-catheterization post-treatment, if required, should be considered for treatment. Patients with diabetes mellitus treated with BOTOX<sup>®</sup> were more likely to develop urinary retention than non-diabetics.

**The dose of BOTOX<sup>®</sup> is not the same as, or comparable to, another botulinum toxin product.**

**Serious and/or immediate allergic reactions have been reported.** They include itching, rash, red itchy welts, wheezing, asthma symptoms, or dizziness or feeling faint. Get medical help right away if you experience symptoms; further injection of BOTOX<sup>®</sup> should be discontinued.

**Tell your doctor about all your muscle or nerve conditions** such as ALS or Lou Gehrig's disease, myasthenia gravis, or Lambert-Eaton syndrome, as you may be at increased risk of serious side effects including difficulty swallowing and difficulty breathing from typical doses of BOTOX<sup>®</sup>.

**Tell your doctor about all your medical conditions, including if you:** have or have had bleeding problems; have plans to have surgery; have symptoms of a urinary tract infection (UTI) and are being treated for urinary incontinence. Symptoms of a urinary tract infection may include pain or burning with urination, frequent urination, or fever; have problems emptying your bladder on your own and are being treated for urinary incontinence; are pregnant or plan to become pregnant (it is not known if BOTOX<sup>®</sup> can harm your unborn baby); are breastfeeding or plan to (it is not known if BOTOX<sup>®</sup> passes into breast milk).

**Tell your doctor about all the medicines you take,** including prescription and nonprescription medicines, vitamins, and herbal products. Using BOTOX<sup>®</sup> with certain other medicines may cause serious side effects. **Do not start any new medicines until you have told your doctor that you have received BOTOX<sup>®</sup> in the past.**

Tell your doctor if you have received any other botulinum toxin product in the last 4 months; have received injections of botulinum toxin such as *Myobloc*<sup>®</sup>, *Dysport*<sup>®</sup>, or *Xeomin*<sup>®</sup> in the past (tell your doctor exactly which product you received); have recently received an antibiotic by injection; take muscle relaxants; take an allergy or cold medicine; take a sleep medicine; take aspirin-like products or blood thinners.

**Other side effects of BOTOX<sup>®</sup> include:** dry mouth, discomfort or pain at the injection site, tiredness, headache, neck pain, and eye problems: double vision, blurred vision, decreased eyesight, drooping eyelids, swelling of your eyelids, and dry eyes. In people being treated for urinary incontinence other side effects include: urinary tract infection, painful urination, and/or inability to empty your bladder on your own. If you have difficulty fully emptying your bladder after receiving BOTOX<sup>®</sup>, you may need to use a disposable self-catheter to empty your bladder up to a few times each day until your bladder is able to start emptying again.

For more information refer to the Medication Guide or talk with your doctor.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch) or call 1-800-FDA-1088.
